

Gain Field and Lab Experience!

Who: Undergraduates interested in doing field or lab work on the behavior, physiology and conservation of mammals and birds in the sagebrush steppe.

Ecological Field Component

What: To work as a volunteer or for credit. We need extra hands in the sagebrush steppe habitat to locate and observe sage grouse and pygmy rabbits and collect sagebrush samples.

When: November 7 & 8

November 19 - 25

November 27 - 30

December 16 - 23

December 27 - 31

January 3 - 16

Friday-Sunday during several weekends in February

These dates are not flexible and are at least 3 hrs from Boise.

Please include in your application the sessions you are able to work. You do not need to work all of the sessions but must be present for all the days in the session you sign up for. We will provide transportation and lodging, you are responsible for your meals and clothes for the weather.

Nutrition and Chemistry Lab Component

What: To process and prepare sagebrush leaves for chemical and nutritional analysis for credit or pay (\$7-9/hour depending on experience).

When: March thru mid-June

Flexible around your class schedule

Why should you sign up?

- Undergraduate field and lab work is a great way to network and get good references for jobs and advanced degrees in biology.
- You will be participating in local science, interact with conservation agencies, and learn about the scientific process hands-on.
- It is actually fun!

How to apply:

Contact Amy Ulappa at amyulappa@u.bosiestate.edu and send 1 paragraph detailing why you are interested in the field or lab work (or both). Include qualities you have that would make you

good for difficult fieldwork in the winter and/or basic lab work. Include dates for field work that you can attend. No prior experience needed.
