

REMOTE SUMMER

BOOTCAMP

JULY 12-15, 2021

This remote event is hosted by CAES in collaboration with CAES universities: **Boise State University and Idaho State University.**

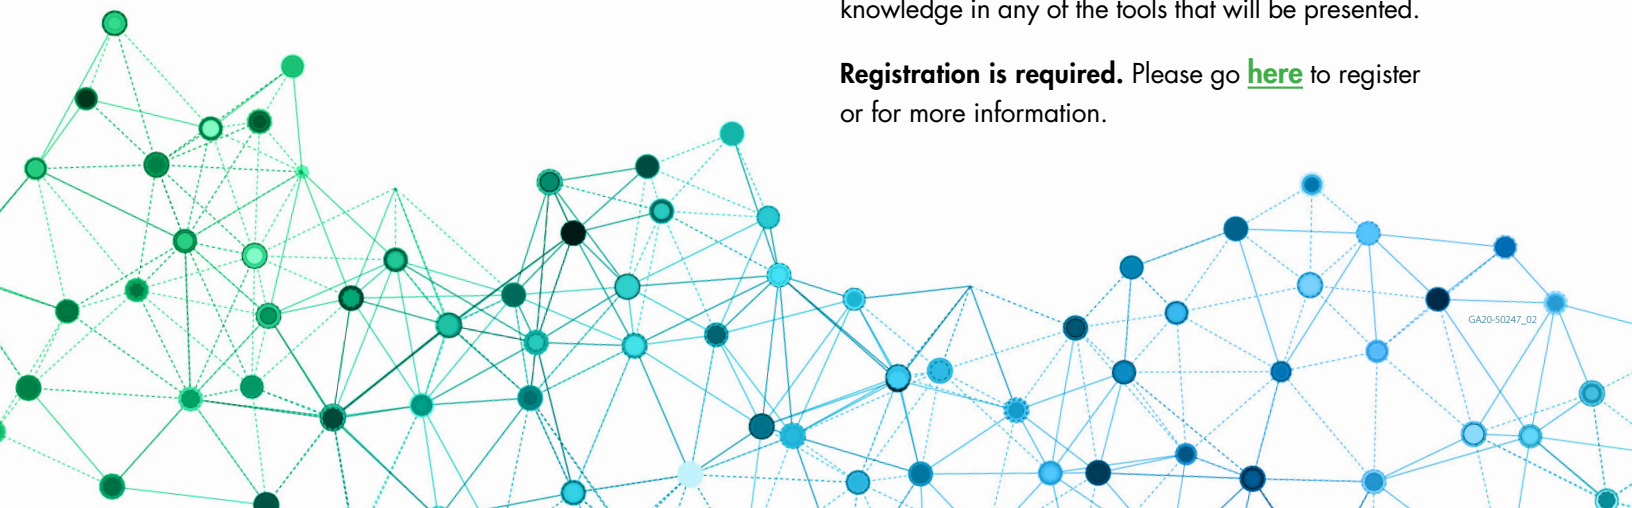

CAES Center for Advanced Energy Studies

Open to students, faculty, and researchers interested in using visualization, machine learning, and data mining tools in their research and learning how these tools are used in industry applications.

Sessions will include data science tool tutorials; industry presentations; and a research discussion panel that aims to present, highlight, and explore opportunities for collaborative research.

Participants don't need to be proficient or even have knowledge in any of the tools that will be presented.

Registration is required. Please go [here](#) to register or for more information.

A COLLABORATION BETWEEN

 Idaho National Laboratory
