

**BOISE STATE UNIVERSITY**

COLLEGE OF ENGINEERING

*Micron School of Materials Science and Engineering*

## **Graduate Research Assistant Position in Materials Science & Engineering Interdisciplinary Graduate Program**

**Purpose:** To identify a research supervisor and research project to complete doctoral research.

**Research Lab:** Lab to be determined. This is for a rotation position - see description below.

**Position Supervisor:** Graduate Faculty in Materials Science & Engineering. Specific faculty involved will be determined according to project and funding availability.

---

**Position Description:** This position is for a non-advisor specific graduate research assistantship within the Interdisciplinary Graduate Program in the Micron School of Materials Science & Engineering. Candidates accepted to this position will be supported by the program, and expected to complete rotations through one or more research groups within the first year of the graduate program. The goal of these rotations is to identify a best-fit for both the student and the faculty mentor to support a successful graduate experience.

**Preferred Qualifications:** Strong candidates will be excited and prepared to excel in graduate school. Must be able to problem solve and self-motivate. Broad interest areas within the field of materials science and engineering are preferred. Students from all STEM backgrounds will be considered. Must be admitted to the MSE Interdisciplinary Ph.D. Program.

All Graduate Assistants in Materials Science & Engineering receive a stipend, full tuition waiver, and health insurance.
