This results summary reflects the percent of programs in each of the four levels of achievement across seven domains of the PAR. Reports are reviewed and scored by teams of faculty and staff with feedback reports provided to each program. The rubric can be found at: <https://www.boisestate.edu/ie-assessment/process/forms/>. The pandemic-related adjustments applied only to FY21, FY22, and FY23, with the data in FY24 reflecting the shift back to standard expectations.

Note that programs can receive ratings of "No evidence" for numerous reasons, among them: the program may be new; the assessment plan or process in the program has undergone major revision and, thus, they do not have new information to share at the time of the report; the program has evidence but did not provide it in the report; or the program does not have evidence or made progress in the particular domain. Therefore, contextual information is helpful in interpreting the reviews.
