

WORKING WITH WORKING LANDS

SPEAKER EVENT

Brought to you by the School of Public Service, Environmental Studies, College of Arts and Sciences - Philosophy, School of the Environment, the President's office, and the Division of Research and Economic Development.

WHEN AND WHERE

November 8, 2023 from 2:00 p.m - 3:30 p.m.
Student Union Building Lookout Room

ABOUT THE SPEAKERS

Dr. Paul B Thompson is the author of the awarded book *Spirit of the Soil*, detailing the ethics of food production and ideals that guide varying agricultural communities. Dr. Thompson's research is on the ethics and value-dimensions of agriculture and the challenges agriculture communities are currently navigating.

Dr. Robert Frodeman is the co-author of *Socrates Tenured*, detailing the pathologies and politics of knowledge production in the 21st century university. Dr. Frodeman's research envisions the future of the University where knowledge brokers help to match the supply and demand of a sustainable knowledge economy.

ABOUT THE EVENT

Much of Idaho consists of rural and remote working lands. Working with working land communities requires appreciating the unique challenges they face and self-reflection regarding the sustainability of knowledge production itself. These talks help prompt this reflection and introspection with our shared Boise State community.
