

BOISE STATE UNIVERSITY

Think **BIG!**

Developing a Human-Centered Approach to Research in Higher Education

Think Big! is an interactive workshop designed for graduate students and postdocs at Boise State to explore new research and creative pathways using a user-centered, design-thinking approach. Participants will engage in interdisciplinary collaboration, leveraging creative techniques and co-design methods to enhance problem identification, research impact and innovative solutions. Through hands-on activities and case studies, they will cultivate curiosity, creativity and empathy while integrating human-centered research practices to generate meaningful societal impact.
