*No more than six elective credits of SOC may be applied toward the minor.	

LABOR STUDIES MINOR

BOISE STATE UNIVERSITY

COLLEGE OF ARTS AND SCIENCES

Department of Sociology

WHAT

IS IT?

WHY

LABOR STUDIES?

BEYOND

THE MAJOR

A multidisciplinary program, the Labor Studies Minor examines the role of work in society.

Labor is understood as a social practice that undergoes historical development, and that shapes and is shaped by other social institutions.

Labor is an economic phenomenon, and workers and labor organizations play a role in politics and in the management of many workplaces. Labor, paid and unpaid, is a key feature of family life, and segregated labor markets are central to systems of ethnic and gender inequality.

Add value to your other degrees, minors and certificates by becoming a more effective participant in the workplace and in civic affairs, and more appreciative of the centrality of work in our lives, our communities and our relationships.

*be better prepared for any role
in any workplace*
